Fluorescent Latex Beads

Our fluorescent particles are priced according to chemical modification (unmodified, carboxylated, or aminated). All colors and all diameters are the same price. Please refer to the charts on the right for catalog numbers.

- available in four different colors (red, yellow-green, blue, orange, magenta)
- available as unmodified, carboxylated, or aminated
- traceable to NIST size standards
- product will be within 10% of specified diameter

Nonspherical Polystyrene Latex Particles (10% solids)

- available shapes: peanut, snowman, pear
- offer unique physical properties (light scattering, fluid dynamic behavior)
- entire population per batch is identical in size and shape
- length specified refers to longest measurement of single particle
